Corrective Action

Secure Database

## Not Just SPC

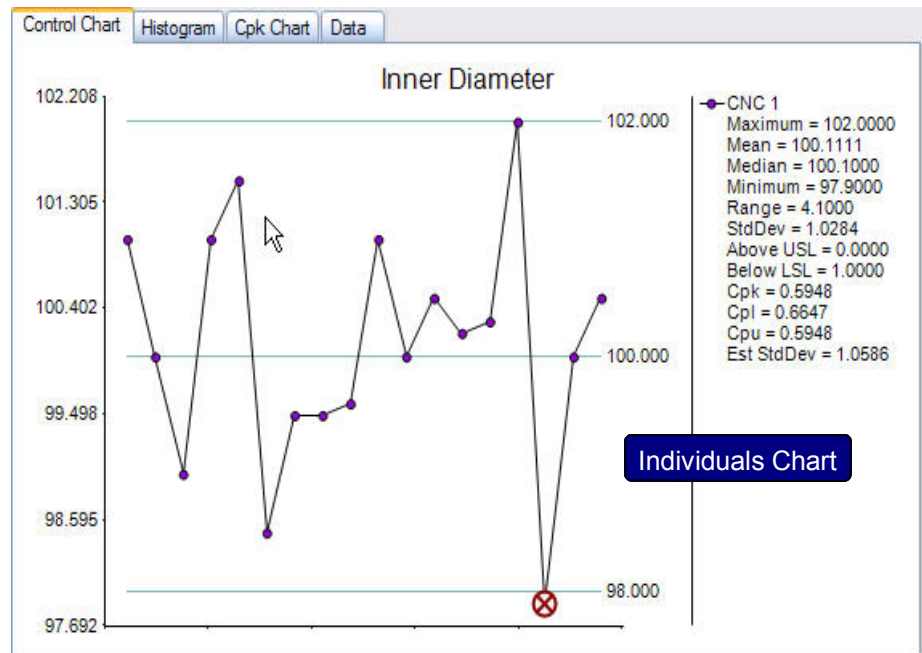

VDISOFT's Quality System allows you to manage every aspect of your processes. Improving quality takes more than just graphs. It takes in-depth analysis and continuous, real-time assessment. Our Quality System is easy to use on the shop floor while allowing management to see up-to-the-minute overall progress right from their desktop computers.

## Why VDISOFT?

VDISOFT has been in the market for over a decade. With over 50 of the Fortune 500 and many of the Global 1000, VDISOFT is a trusted name in quality control. We take the time and energy to consult with our customers. Our products have helped companies all over the world decrease scrap and increase quality, without increasing costs. We believe that our job isn't done until you're saving time and money.

## Will We Need Training?

We didn't design our Quality System alone. We worked extensively with manufacturing plant employees. We listened carefully to quality assurance specialists, machine operators, and six sigma experts to create a solution that's both powerful and easy to use. Our intuitive data entry screen and simple quick start manual allow you to begin data investigation in ten minutes. So, forget about sitting through hours of boring training and start improving quality today.

**Capability Analysis**  
Process capability ratios are a common and efficient way to summarize an entire process with just a single number. VDISoft's Quality System lets you print capability reports in just a few clicks. You will know where you should focus valuable time and resources. Quality System also tracks capability numbers over time. Users, management, and even customers are able to easily understand how corrective actions are improving overall quality.

## Chart Features

- Statistics
- Control and Spec Limits
- Western Electric Rules
- Data Filtering
- Pop-up Info on Each Point

## Where's Your Data?

It's easy to import data from Excel into VDISoft's Quality System. Just copy and paste! Data not in Excel? Our technical experts are trained to make your transition to Quality System as smooth as possible.

## Alerts and Causes

Our Quality System allows you to create rules based on your needs and goals. When a rule is violated, an alert is fired. Users see a pop-up box window where they can enter a cause, corrective action, and a comment. Not all rules are the same: the control chart indicates whether a high, medium, or low level rule was violated.
